

Rocket® TRUfusion™ Enterprise

Automated, traceable, secure CAD
and PLM data exchange

Rocket® TRUfusion™ Enterprise takes the friction out of collaborative design by replacing disconnected, manual data exchange tasks with a single automated process that integrates with key systems for managing engineering and design data. It's a simple, cost-effective, complementary solution for companies using PLM systems such as Siemens Teamcenter® or PTC Windchill™, allowing you to easily and securely manage exchanges of CAD files and related product design data from within your PLM system.

Benefits/Features

Improve employee productivity

For high transaction volume CAD data exchange and PLM workflow, the potential savings can be thousands or even tens of thousands of person-hours/year.

Keep IP out of the wrong hands

Helps ensure that your IP goes only where it should and is managed with appropriate attention to data protection policies by all parties.

Prevent mistakes, delays, false starts

Helps prevent accidentally sending the wrong files, incomplete file packages, sending data to the wrong person or an old file revision.

Easy-to-use browser-based portal

Our portal makes it easy for your supply chain partners to download the files you send and for them to send files back to you.

Full audit trail

Every transaction has a full audit trail so if you do get errors, you have the information to correct errors and restart the transactions.

Supports many standards and systems

We can build file-transfer integrations between different product design authoring and data management software, including those developed in-house.

What our customers have to say

Implementing the TRUfusion Enterprise Teamcenter integration was the logical next step for us in our journey towards greater automation, productivity, and accuracy in our PDX. Throughout our established relationship with Rocket, we've received ongoing support that reassured us we were in good hands, so we didn't need to undergo an expensive and time-consuming transition to a competing solution to get the capabilities we needed."

SVEN KAFKA
Engineering Team Leader,
Magna Roof Systems

With Rocket TRUfusion Enterprise you can:

Streamline and automate

Streamline your entire product development process, from RFQ to approval of a production-ready design.

Share product design data

Share engineering CAD and related design data in less time, with lower costs.

Improve employee productivity

Batch processes through integrations with PLM and CAD related software free employees for more valuable work.

Simplify compliance

Using fully-auditable processes, you can better meet customers' quality, naming, and security mandates.

Prevent costly errors

Automation inherently drives integrity and accuracy, because it limits the chance for human error.

Replace disconnected, manual tasks

Automating the product design data exchange process ensures data integrity and accuracy.

Why partner with Rocket Software?

95%

FEWER HUMAN HOURS
SPENT ON DATA EXCHANGE

A Tier 1 automotive supplier deployed TRUfusion Enterprise to standardize and automate the design data exchange process across their internal sites worldwide.

100%

AUTOMATED CAD DESIGN
DATA EXCHANGE

A leader in thermal management devices transformed their entire process by using TRUfusion Enterprise, our high-capacity communications solution for integrated file transfer.

The future won't wait—modernize today.
