

Rocket® DOCU/TEXT

Generate documentation for streamlined operations

In today's complex IT world, data centers run several thousand jobs. Maintaining them throughout the Job Control Language (JCL) lifecycle can be challenging. In addition to job validation that ensures syntactic correctness, there is also a need to maintain documentation for these jobs. Rocket Software offers DOCU/TEXT to streamline your operations by generating operations and systems documentation from existing sources within the data center to help any data center with their production JCL environment.

Benefits/Features

Increases production efficiency

Enables efficient production, JCL analysis, and operations documentation.

Creates comprehensive documentation

Generates complete, reliable, accurate job documentation.

Automates tasks

Eliminates the manual work involved in documenting jobs.

Accelerates turnaround time

Returns jobs to production faster due to reduced research and analysis time.

Interfaces with data center solutions

Interfaces with library management, tape management, change control, schedulers, security, and other data center software products.

Rocket® JOB/SCAN is a natural pairing with DOCU/TEXT to bring JCL Management tooling for your developers to complement the documentation and cross-referencing provided by DOCU/TEXT.

Benefits of DOCU/TEXT:

Automatic document production

DOCU/TEXT generates reports from existing sources in data centers resulting in reliable, accurate, and complete job documentation.

Plan for the future

DOCU/TEXT automatically produces run books that provide instant access to critical operations information.

Automation increases productivity

DOCU/TEXT eliminates the manual work involved with completing a project, increasing productivity.

Manage change carefully

DOCU/TEXT produces an enterprise-wide cross reference that parses the Job Control Language, extracts key elements, and organizes them in a repository.

Promote knowledge and understanding of critical JCL in your IBM Z® environment with operations and systems documentation from Rocket DOCU/TEXT.
