

Rocket® Mainstar® FastAudit

Maintain z/OS® data health with fast, flexible, accurate audits

Without fast, accurate, reliable audits, you risk losing access not only to your IBM® z Systems data but also to your migrated DFSMS and DFSMSHsm data. Keeps your z/OS® environment trouble-free with high-speed, accurate, and flexible audits using Rocket® Mainstar® FastAudit, a powerful data integration and auditing solution.

Benefits/Features

Run audits as needed

Run frequent audits, even during periods of heavy processing, and view and correct errors in ISPF.

Prevent data loss

Maintain healthy metadata environments and prevent temporary or permanent loss of data access.

Customize and automate audits

Customize and prioritize audits and automated fixes for different types of data.

Tune DFSMSHsm performance

Use information from HSM FastAudit, HSM FastAudit-Media Controls, DFSMS MGMTCLAS auditing and other reports to tune DFSMSHsm performance.

Maintain data integrity

Audit the DFSMS Automatic Class Selection (ACS) routine and ensure the DFSMSHsm management of data is correct and what is expected.

With Rocket Mainstar Fast Audit you can:

Enable any storage admin

Use FastAudit's intuitive user interface with confidence, regardless of experience with DFSMSHsm catalogs and tape-management systems.

Improve data access

Support 24x7 data access while protecting data assets.

Save DFSMSHsm resource utilization

FastAudit audits are non-disruptive to the catalog or DFSMSHsm environment. DFSMSHsm resource utilization, increasing productivity.

Increase auditing flexibility

Design audits that fit your unique environment.

Proactively address metadata integrity

Ensure the health of the metadata structures, controlling access to catalogs, DFSMSHsm control data sets, and tapes controlled by your tape management system.

Improve auditing productivity

Improve productivity by customizing and automating error correction.

Why use FastAudit?

1

In typical mainframe environments, DFSMSHsm manages hundreds of thousands to millions of data assets.

2

60 to 150 times faster than the DFSMSHsm AUDIT command and the Enhanced AUDIT command.

3

One HSM FastAudit procedure runs the equivalent of approximately 15 AUDIT commands.

The future won't wait—modernize today.
